OT-VL03 - Wired Device

OT-VL03

Wired Asset Trackers

The perfect unit for: Golf Carts Personal or Fleets, Mowers & Utility Vehicles

Up to 15 second location updates while moving

- Trip/History Reports
- Geofence Alerts
- Direct to 9-90 v Power
- Unlimited Real-Time Tracking

The OneTrac GPS OT-VL03 is a 4G LTE GPS tracker designed mainly for the management of vehicles. **Its 9-90V input voltage range makes it compatible with a wide variety of vehicles.** An advanced GPS antenna ensures strong signal acquisition and more accurate positioning. With multiple alerts, these units can help facilities manager their fleets and course traffic.

Cart Monitoring System – The OT-VL03 GPS Tracker units coupled with our tracking platform allow facilities to keep track of all their assets. The unlimited amounts of geofencing ,alerts and reporting can give you the control over a wide variety of issues that tend to arise during the day.

Pace of Play– With the use of geofencing we are able to establish our pace timer for holes 1 & 10 giving you up to the second information on when the cart has teed off.

Installation – Installation is a breeze with the ability to connect to any power source ranging from 9-90 volts. The units can be connected under the seats directly to the battery or for added security they can be installed in the dashboard by tapping into a power and ground line.

- ✓ IP65 Dust and Water Resistant
- ✓ 9-90V Rated Input Voltage
- ✓ Vehicle Battery Protection
- ✓ Remote Cut-off (Fuel/Power)
- ✓ GPS, WIFI, & LBS Positioning
- ✓ 4G LTE Cellular Service
